

# CLIMATE ACTION TASMANIA

**Are you concerned about global warming?  
Do you want to take some action?**

**A Tasmanian action network is forming. Join us!**

- Global warming is real and already threatens our future.
- It is our responsibility to act now individually & collectively to reduce greenhouse gas emissions & to prepare for a changed world.
- The group will use collaborative action to change our lifestyles, corporate behaviour and government policy in response to the climate crisis.

Climate Action Tasmania will work to:

- Obtain and disseminate information
- Influence government policy
- Motivate change in community and corporate behaviours
- Support individual and local initiatives

by:

- Sourcing current research and models of community action
- Convening and contributing to meetings and public lectures
- Informing and engaging with the media
- Submitting responses to government policy documents
- Participating in consultations with appropriate agencies
- Leading by example to promote a carbon neutral lifestyle
- Providing a focus for discussion and support, to move from ideas to action.

The group is currently hosted by Sustainable Living Tasmania, 102 Bathurst St, Hobart 7000 6234 5566 [info@sustainablelivingtasmania.org.au](mailto:info@sustainablelivingtasmania.org.au). We will contact you soon about our launch.

.....  
Yes I am interested in participating in the Climate Action Tasmania Network. Please contact me about events and activities.
